

MediaINFO

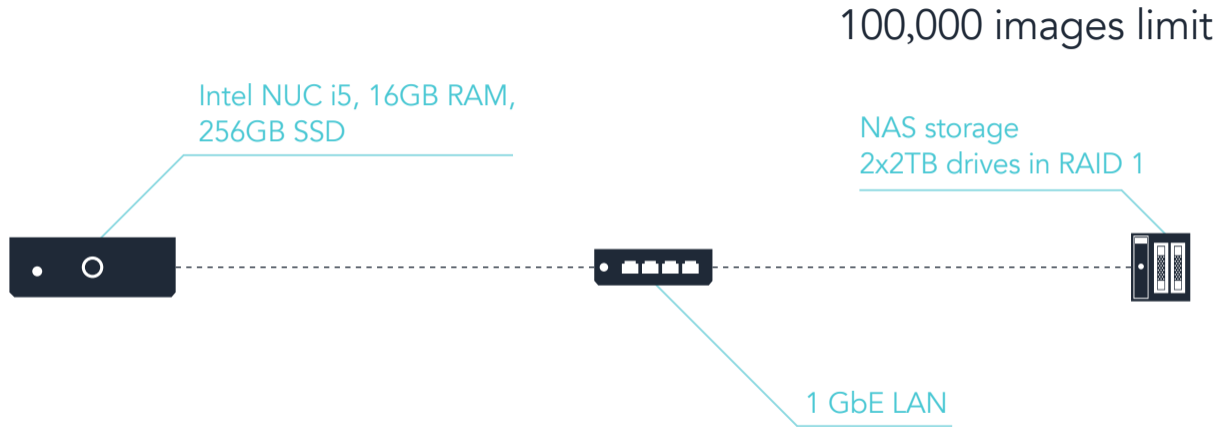

System Requirements

MediaINFO System Requirements

Listed below are recommended system requirements for various MediaINFO licenses based on typical usage scenario (90% OCR-ed content of A4 size. Other 10% are mixed images of average A4 size. Light concurrent usage). Exact specifications are provided per project when the input material type, physical size, scanning resolution and bit depth is defined.

* Exact hardware will vary from supplier to supplier. Above CPU models and disk sizes are only indicative and may vary

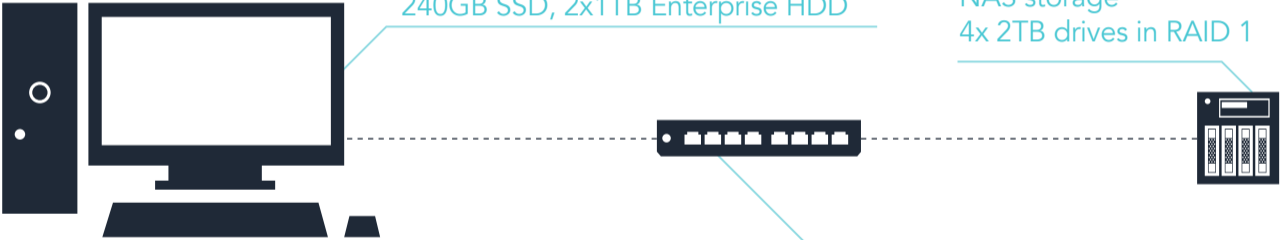

200,000 images limit

i7-3930K 3.2GHz or better, 32GB RAM
240GB SSD, 2x1TB Enterprise HDD

NAS storage
4x 2TB drives in RAID 1

1 GbE LAN

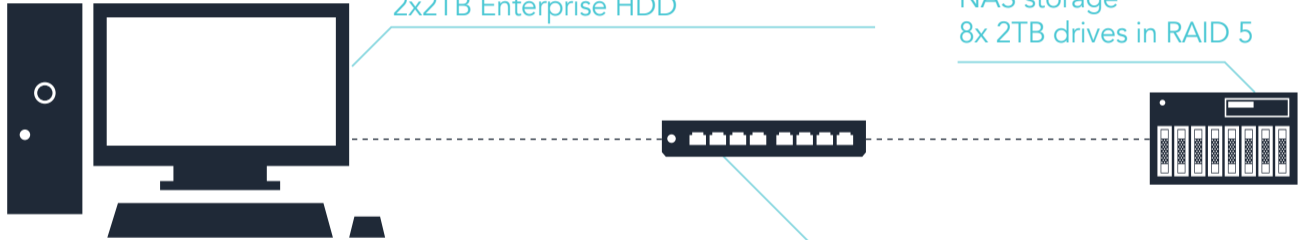

500,000 images limit

i7-3930K 3.2GHz or better, 64GB RAM
2x240GB SSD in RAID 0,
2x2TB Enterprise HDD

NAS storage
8x 2TB drives in RAID 5

1 GbE LAN

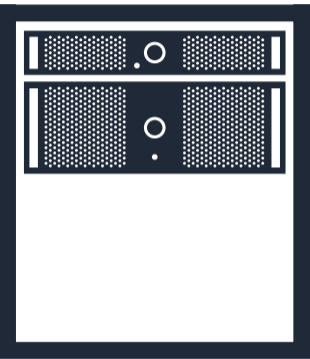

1,000,000 images limit

i7-3930K 3.2GHz or better, 96GB RAM
2x480GB SSD in RAID 0,
2x4TB Enterprise HDD

NAS storage
8x 4TB drives in RAID 5

1 GbE LAN

XEON E5-2665 or better, 96GB RAM
2x480GB SSD in RAID 0,
2x4TB Enterprise HDD

XEON E5-2665 or better, 32GB RAM
240GB SSD, 2x1TB Enterprise HDD

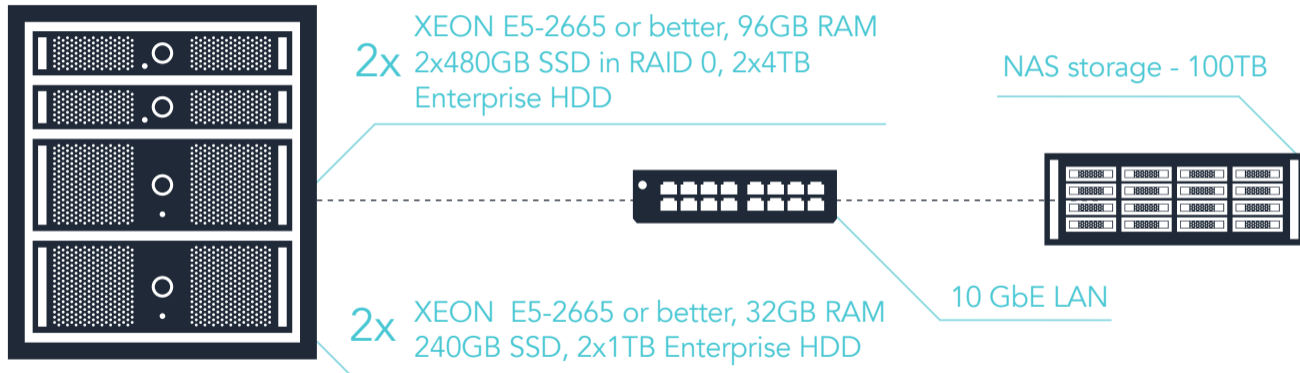

2,000,000 images limit

NAS storage
16x 4TB drives in RAID 5

10 GbE LAN

5,000,000 images limit
