

Cultural, Heritage, Art, Design & Archaeology 3D Scan Solution

Simplifying Your Move from Physical to Digital

- PRESERVE THE PAST IN DIGITAL FORM
- BRING ART, SCIENCE & TECH. TO LIFE
- AFFORDABLE 3D CREATION FOR EVERYONE

3D  VOK

3DeVOK MQ

3DeVOK MQ is your go-to tool for Cultural Heritage, 3D Printing, Artistic Design, Education, & more.

- Dual-Mode • Versatile
- Marker-Free • Wireless
- Invisible Scanning

With true wireless freedom and intuitive operation, it lets you capture high-quality 3D data anytime, anywhere, effortlessly.

Features 22-line infrared laser and large-format infrared speckle dual-light source technology, enabling wireless free scanning and eliminating cable constraints.

Friendly and Professional - With a flexible scanning range of 150-1500mm, even first-time users can achieve professional results with ease.

Type	Accuracy	Resolution	Object Size
Hand Held	0.08 mm	0.1-5 mm	S, M, L

3DeVOK MT

An industrial-grade color 3D scanner, featuring three light sources, hybrid alignment, and marker-free scanning.

- No-marker 3D Scanning
- Large-scale Scanning
- Invisible Light Scanning

34 blue laser lines + 22 infrared laser lines + Large-area infrared speckle.

Support high-definition color scanning, enhanced by high-resolution camera and texture mapping, delivering true-to-life texture and reproduction of objects.

Ideal for Cultural Heritage, Artistic Design, Reverse Engineering, Visualization, 3D Printing, Research, and Education, it excels in scanning various objects with precision and reliability.

Type	Accuracy	Resolution	Object Size
Hand Held	0.04 mm	0.05-5 mm	S, M, L

3DeVOK MT GEN2

The 3DeVOK MT Gen2 combines SCANOLGY's Industrial-Grade DNA Technology with Quad-Light, upgraded optics and algorithms

Makes it ideal for Reverse Engineering, Automotive & 3D Inspection.

Capable of efficiently scanning varying sizes and materials, with stable & reliable data, helping streamline the entire workflow from design to manufacturing.

- Supports multiple formats for seamless workflows.
- Certified to multiple international standards
- Multi-Size, Multi-Material

Type	Accuracy	Resolution	Object Size
Hand Held	0.03 mm	0.2-5 mm	S, M, L

3DeVOK Studio

3DeVOK Studio is a free Professional-grade 3D scanning PC application designed for High Precision, Real-Time Scanning and Post Processing.

It integrates seamlessly with the 3DeVOK MT and 3DeVOK MQ, and supports multiple scanning modes, including laser and infrared speckle, to accommodate diverse scanning scenarios.

The software is included in the box with every 3DeVOK scanner, so you can start scanning right away.

"No subscriptions. No hidden fees"

3DeVOK Airgo

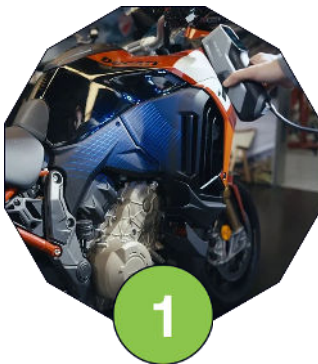

Experience true scanning freedom with the 3DeVOK Airgo handle for your 3DeVOK MT or 3DeVOK MQ handheld 3D scanner. Use your 3D scanner in the studio, in the field, or wherever you go.

Elevate your workflow with Wireless 3D scanning Built for seamless integration with the 3DeVOK MT and 3DeVOK MQ 3D scanners, the Airgo wireless handle combines precision engineering with ergonomic design.

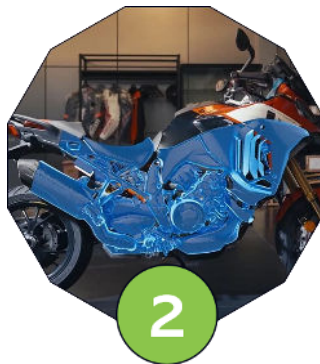

Its Secure Grip ensures comfortable handling, even during extended scans. With a Powerful Dual-Battery System and Wireless Connectivity with external adapter, the Airgo handle delivers smooth, uninterrupted performance.

Effortless 3D Scanning Workflow

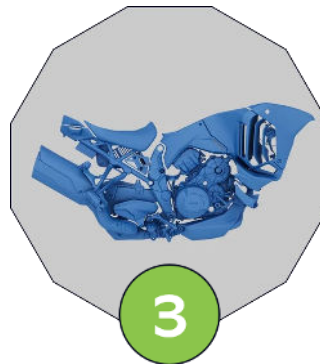

Scan Your Object

Move the scanner around freely. Real-time feedback shows what's captured and what's not, so you never miss a spot.

Refine Your Scan

Easily clean, align, and optimize your 3D model with powerful yet intuitive tools built right into 3DeVOK Studio

Export and Create

Get your scan ready for 3D printing, design, or rendering. Export in common formats and continue your work in the software you already use.
